

Conference Programme at a glance – 7th -8th JULY

SUNDAY 6th July

Time	What is happening
5.30 – 6.30	NR-SIG-WFNR Committee Meeting
7.00 – 8.00	Welcome Drinks @Mantra Mooloolaba Hotel

MONDAY 7th JULY

Time	What is happening
8.00	Arrival, Registration and Find out where to hang posters
8.45-10:40	8:45 Welcome by Convenors: Tamara Ownsworth Session 1: Neurorehabilitation perspectives and outcomes Chair: Tamara Ownsworth 8:55 - Jennie Ponsford: Multidimensional classification and prediction of outcome following traumatic brain injury 9:10 - Jessica Trevena-Peters: Cognitive rehabilitation following traumatic brain injury: Variations in clinician practice across geographical sectors 9:25 - Q&A Datablitz: Professional practice developments 9:35 - Sheryl Park (PR): Development and work of the UK national network for clinical psychologists working in specialist neurorehabilitation (DB1) 9:40 - Ieke Winkens (PR): Effects of working with the ABC method, an intervention for nurses dealing with challenging behaviour of patients with brain injury (BD2) 9:45 - Kate Gould: A twin-stream model of capacity building positive behaviour supports for brain injury rehabilitation services (DB3) 9:50 - Rachel Munyard: Teamwork in cognitive rehabilitation: A global multidisciplinary perspective on collaboration, team structure, and role dynamics (DB4)
10.00-10:30	Morning tea
10.30-12.00	Session 2: Care and support innovations Chair: Jennie Ponsford 10:30 - Caroline Bottari: A roadmap for the creation of an integrated ecosystem of care for women victims of Intimate Partner Violence and traumatic brain injury: First steps 10:45 - Stacey Oliver: Changes in well-being and community integration for people with disability and complex needs: outcomes of living in a 10+1 apartment at 6 and 12 months. 11:00 - Kimberly Chew: Evaluating the feasibility of a co-designed cyberscam psychosocial recovery intervention framework for people with acquired brain injury 11:15 - Q&A Datablitz: Program development and evaluation 11:25 - Ana Rita Silva (PR): 8-week holistic neuropsychological rehabilitation program for adults with brain injury on an outpatient basis: a case series (DB5) 11:30 - Amy Huynh: Development and evaluation of a community-informed group-based cognitive rehabilitation program for people with Huntington's disease (DB6) 11:35 - Egberdina-Józefa van der Hulst: An interdisciplinary neuropsychology-led formulation framework initiative adapted for use in an acute neurological care setting: Preliminary findings from the Rapid Access Acute Rehabilitation Programme (DB7) 11:40 - Katherin Olsson: At a Crossroad – Developing an outpatient ABI-Psychiatry Clinic for young people with moderate-severe brain injury (DB8) 11:45 - Bianca Bondi: What about our kids? A mixed method readiness and needs assessment for equitable mental health support for parents of children with rare genetic disorders (DB9)

	11:50 - Shai Betteridge: The experience of using the empowerment behavioural management approach (EBMA): A thematic analysis (DB10) 11:55 - Tricia Williams: Meeting the psychological needs of children with congenital heart disease (CHD): Tackling top behavioral challenges and family stress (DB11)
12.00–1.00	Lunch
1.00-2.45	Session 3: Advances in Methodology and Evaluation Chair: Kate Gould 1:00 - Jon Evans: A proposed regulatory and ethical framework for the application of single-case experimental design methodology in rehabilitation research and clinical practice. 1:15 - Robyn Tate: Improving the planning and reporting of single-case experimental designs: two new resources 1:30 - Michael Perdices: Developing a method to classify the strength of external validity of single-case studies in the neurorehabilitation literature 1:45 - Nicholas Behn (PR): Developing a Programme Theory for Communication Partner Training in Acquired Brain Injury using the Behaviour Change Technique Taxonomy (BCTTv1) and national e-Delphi survey 2:00 - Q&A Datablitz: Lived Experience and Inclusive Research 2:15 - Jessie Mitchell: Reclaiming agency in care decisions: Perspectives of people with acquired brain injury and their family members and co-design of a personalised self-advocacy tool (DB12) 2:20 - Megan Topping: Co-design and preliminary analysis of a pilot resource quality measure for people with disability (DB13) 2:25 - Skye King (PR): Participant experiences of an intensive exposure intervention for persistent post-concussion symptoms (DB14) 2:30 - Kimberly Chew: “No more shame”: Participant Experiences of a Novel Cyberscam Psychosocial Recovery Intervention (DB15) 2:35 - Halima Nalaye: Rehabilitation through a cultural lens: the experience of culturally and linguistically diverse traumatic brain injury survivors in Australia" (DB16) 2:40 - Penny Trayner: “They talk over her, to her, through her and they don’t actually direct the questions to her”: Discussing the need for a patient portal application in paediatric rehabilitative care (DB17)
2:45-3:30	Afternoon tea and Poster Session 1
3.30-5.25	Session 4 Chair: Robyn Tate 3.30 - NR-SIG Chair Keynote – Caroline van Heugten (V) 4:10 - Fleur Domensino (V): Psychometric properties and clinical usability of the Cognition in Daily Life scale (CDL) in patients with acquired brain injury Caregiver and family support interventions 4:25 - Tricia Williams: Implementing caregiver coaching into neonatology and neurology Clinics: A Twelve-Month Implementation Initiative 4:40 - Katarzyna Lion: An adapted Telehealth Making Sense of Brain Tumour program (Tele-MAST) for current and bereaved caregivers of people diagnosed with high-grade glioma: A mixed methods study 4:55 - Aimee Brown: The Dementia, Sleep and Wellbeing Program: A pilot feasibility study of a multimodal online sleep health program for people living with dementia and their care partners 5:10 - Q&A
5.25	Close Day 1
7.00	Conference Dinner @ The Dock Mooloolaba

TUESDAY 8TH JULY

Time	What is happening
8.00	Arrival, Registration and Find out where to hang posters
8:45-10.40	Session 5: Psychosocial well-being Chair: Louise Gustafsson 8:45 - Hannah McGlashan: GROUPS 4 HEALTH: Adaptation and feasibility of a group intervention to increase community connectedness and psychological adjustment in adults with acquired brain injury 9:00 - Melissa Kendall: 'Staying Connected': a translational framework to support friendships after acquired brain injury and spinal cord injury. 9:15 - Jacinta Douglas: Just being part of the group was enough" Exploring the experience of group participation from the perspectives of adults with severe Traumatic Brain Injury (TBI) 9:30 - Rachel Brough: Supporting self-continuity after acquired brain injury: A qualitative study of priorities, expectations and experiences of rehabilitation during the early post-discharge period 9:45 - Q&A Datablitz: Social and environmental interventions 10:00 - Jayasree Sampath (PR): Impact of Nature therapy in Neuropsychological Rehabilitation among Brain Injury Survivors (DB18) 10:05 - Susan Jones: Integrating environmental enrichment into neurorehabilitation (DB19) 10:10 - Gerard Riley (PR): Continuity Therapy: The development of a relationship therapy for couples living with brain injury (DB20) 10:15 - Michael Norwood: Viewing local natural environments in immersive virtual reality to alleviate psychological distress in hospital-based neurorehabilitation (DB21) 10:20 - Rebekah Billington-Kerr: Fetching connections; Dog walking as an adjunct to traditional speech therapy (DB22) 10:25 - Diego Maciel-Lima (PR): Career guidance program for people with tuberous sclerosis complete: Single case experimental design (DB23) 10:30 - Irena Tasevska: Self-instruction and neurological music therapy: feasibility of a novel intervention for executive functioning in traumatic brain injury (DB24)
10.40-11.15	Morning tea
11.15-12.55	Session 6: Cognition and assessment Chair: Michael Perdices 11:15 - Sharon Savage: Development of a word finding difficulty clinical rating scale 11:30 - Gail Robinson: A novel rapid executive function screening tool for acute stroke 11:45 - Amber Ayton: Ageing with traumatic brain injury: Long-term cognition and wellbeing 12:00 - Q&A Datablitz: Understanding and enhancing cognition and behaviour 12:15 - Catarina Baptista (PR): Feasibility of REMINDER, a dementia risk reduction program: A comparison between community and institutional settings (DB25) 12:20 - Kathleen Vancleef: The impact of a new standardised assessment for visual perception screening after a stroke on clinical practice (DB26) 12:25 - Jose Maria Porto Payan (PR): Assessing decision-making capacity in acquired brain injury: A comparative analysis of clinical tools (DB27) 12:30 - Ellen Hall: evaluating the Community Projects tool to motivate clients with ongoing communication needs (DB28) 12:35 - Isabelle Ellis (PR): Digitising the OAS-MNR: Utilising digital health technology to assess and understand challenging behaviours in neurorehabilitation (DB29) 12:40 - Lesley Murphy: Love Anchor All: Observations and themes in the care and management of global amnesics (DB30) 12:45 - Marcos Maldonado: Assessment of visual tracking, attention, balance and gait in people with neurodegenerative conditions under virtual reality training (DB31)

12.55-1.45	Lunchtime
1.45-3.45	Session 7: Mental health and behaviour Chair: Jon Evans 1:45 - Lee Cubis: Understanding the impact of behaviours of concern on hospital discharge outcomes 2:00 - Jao Carminati: When risks collide: the perfect storm of personal, injury, and psychosocial risk factors to cyberscams for people with and without acquired brain injury 2:15 - Jai Carmichael: Suicidality and non-suicidal self-injury in individuals with traumatic brain injury: Characterisation, risk and protective factors, and coping mechanisms 2:30 - Christy Hogan: Early resilience, psychological distress, and quality of life during early community reintegration after acquired neurological injury: the mediating effects of hope. 2:45 - Alexia Samiotis: Cognitive functioning and transdiagnostic psychopathology dimensions after traumatic brain injury: An application of the HiTOP-TBI model 3:00 - Q&A Datablitz: Mental health assessment and intervention 3:15 - Sarah Adam (PR): A brief CBT-based sleep intervention for individuals under investigation for dissociative seizures: a single-case experimental design (DB32) 3:20 - Cheryl Soo: Evaluation of an online delivered Acceptance and Commitment Therapy program for managing anxiety in adolescents with acquired brain injury: eHealth and treatment acceptability (DB33) 3:25 - Tayla Fox: Guiding the use of the Hospital Anxiety and Depression Scale (HADS) in traumatic brain injury: Associations with clinical outcomes and development of evidence-based severity cut-offs (DB34) 3:30 - Jai Carmichael: Co-developing a transdiagnostic measure of mental health tailored to acquired brain injury: A survey of expert clinicians and researchers (DB35) 3:35 - Steph Reeve: Reaping Rewards: A systematic review of contingency management for individuals with traumatic brain injury that use substances (DB36)
3.45-4.30	Afternoon tea and Poster Session 2
4.30-5.30	Session 8: Occupational function and re-engagement Chair: 4:30 - Ché Phillips: Recovery after severe traumatic brain injury: Return to life and work as a physiotherapist 4:45 - Jessie Mitchell: Personalised pathways to sustained employment: Perspectives of employees with acquired brain or spinal cord injury and other relevant stakeholders 5:00 - Sarah Davies: Feasibility of an occupation-based metacognitive strategy intervention in Parkinson's Disease 5:15 - Q&A
5.30	Wrapping up, next conference & AGM – Prof Caroline van Heugten (All welcome to AGM)
6.15	Conference closed

LIST OF POSTER PRESENTATIONS

Yellow highlight denotes Virtual Poster

Day 1: Monday 7th July

#	First Name	Surname	Title
1	Sasha	Barton	Group Intervention for Children with Acquired Brain Injury and a Parallel Parent Peer-Support Group: A Pilot Study
2	Sasha	Barton	"Where's your evidence?" – the impact of joint working on insight raising and the therapeutic relationship for a patient with CCD.
3	Emma	Cameron	"Not everyone gets back [to work] and that's ok": An Acceptance and Commitment Therapy intervention for patients with neurological conditions exiting work
4	Sarah	Davies	Perspectives of people with Parkinson's disease about an occupation-based metacognitive strategy intervention
5	Michaela	Filipčíková	Deficits in Social Cognition in Neurological and Psychiatric Disorders: A Systematic Review and Meta-Analysis of TASIT/TASIT-S Research
6	Sarah	Garvin	"Thinking about Thinking": A service evaluation of a family/loved ones cognitive education group in inpatient rehabilitation
7	Olga	Glinik	From minimal conscious state to school: childhood TBI neuropsychological assessment and rehabilitation
8	Shweta	Kadaba	Holistic neuropsychological rehabilitation in severe TBI - Case report from Bengaluru
9	Penny	Trayner	Enhancing Accessibility in Music Rehabilitation: Co-Designing an Online DJing Platform
10	Penny	Trayner	Evaluating MSK Rehabilitation and Movement Enhancement in a Brain Injury Population

Day 2: Tuesday 8th July

#	First Name	Surname	Title
1	Penny	Trayner	Social Harmony: The Impact of DJ Rehabilitation in Fostering Social Connectivity
2	Khishigdelger	Nyam-Ochir	Longitudinal study of cognitive changes in patients with partial epilepsy
3	Wei	Qu	Challenging diagnosis and multidisciplinary rehabilitation in a patient with a prolonged period of altered level of consciousness secondary to isolated neurosarcoidosis
4	Cali	Roiboit	Identifying and Mapping Meaningful Cognitive Symptoms and their Impacts in Huntington's Disease: Care Partner Perspective
5	Akshata	Sheth	Facial Emotion Processing in Frontotemporal Dementia
6	Daisuke	Shimizu	Examining the Relationship Between Social Participation and Mental-Psychological Functions in Community-Dwelling Individuals with Acquired Brain Injury
7	Sasha	Barton	Restructuring post-acute neuropsychological rehabilitation for children in a hospital setting
8	Sasha	Barton	Using relative impairments to tell the story of childhood ABI
9	Kosaku	Sunagawa	A correlation analysis of the time required for the numeric input task on tablet and neuropsychological tests among community-dwelling older adults

LIST OF DATABLITZ POSTERS

Yellow highlight denotes Virtual Poster

DB1 - Sheryl Park: Development and work of the UK national network for clinical psychologists working in specialist neurorehabilitation

DB2 - Ieke Winkens: Effects of working with the ABC method, an intervention for nurses dealing with challenging behaviour of patients with brain injury

DB3 - Aly Cazanis: A twin-stream model of capacity building positive behaviour supports for brain injury rehabilitation services

DB4 - Rachel Munyard: Teamwork in cognitive rehabilitation: A global multidisciplinary perspective on collaboration, team structure, and role dynamics

DB5 - Ana Rita Silva: 8-week holistic neuropsychological rehabilitation program for adults with brain injury on an outpatient basis: a case series

DB6 - Amy Huynh: Development and evaluation of a community-informed group based cognitive rehabilitation program for people with Huntington's disease

DB7 - Egberdina-Józefa van der Hulst: An interdisciplinary neuropsychology-led formulation framework initiative adapted for use in an acute neurological care setting: Preliminary findings from the Rapid Access Acute Rehabilitation Programme

DB8 - Katherin Olsson: At a Crossroad – Developing an outpatient ABI-Psychiatry Clinic for young people with moderate-severe brain injury

DB9 - Bianca Bondi: What about our kids? A mixed method readiness and needs assessment for equitable mental health support for parents of children with rare genetic disorders

DB10 – Shai Betteridge: The experience of using the empowerment behavioural management approach (EBMA): A thematic analysis

DB11 - Tricia Williams: Meeting the psychological needs of children with congenital heart disease (CHD): Tackling top behavioral challenges and family stress

DB12 - Jessie Mitchell: Reclaiming agency in care decisions: Perspectives of people with acquired brain injury and their family members and co-design of a personalised self-advocacy tool

DB13 - Megan Topping: Co-design and preliminary analysis of a pilot resource quality measure for people with disability

DB14 - Skye King: Participant experiences of an intensive exposure intervention for persistent post-concussion symptoms

DB15 - Kimberly Chew: "No more shame": Participant Experiences of a Novel Cyberscam Psychosocial Recovery Intervention

DB16 - Halima Nalaye: Rehabilitation through a cultural lens: the experience of culturally and linguistically diverse traumatic brain injury survivors in Australia

DB17 – Penny Trayner: "They talk over her, to her, through her and they don't actually direct the questions to her": Discussing the need for a patient portal application in paediatric rehabilitative care

DB18 - Jayasree Sampath: Impact of Nature therapy in Neuropsychological Rehabilitation among Brain Injury Survivors (DB18)

DB19 - Susan Jones: Integrating environmental enrichment into neurorehabilitation

DB20 - Gerard Riley: Continuity Therapy: The development of a relationship therapy for couples living with brain injury

DB21 - Michael Norwood: Viewing local natural environments in immersive virtual reality to alleviate psychological distress in hospital-based neurorehabilitation

DB22 - Rebekah Billington-Kerr: Fetching connections; Dog walking as an adjunct to traditional speech therapy

DB23 - Diego Maciel-Lima: Career guidance program for people with tuberous sclerosis complete: Single case experimental design

DB24 - Irena Tasevska: Self-instruction and neurological music therapy: feasibility of a novel intervention for executive functioning in traumatic brain injury

DB25 - Catarina Baptista: Feasibility of REMINDER, a dementia risk reduction program: A comparison between community and institutional settings

DB26 - Kathleen Vancleef: The impact of a new standardised assessment for visual perception screening after a stroke on clinical practice

DB27 - Jose Maria Porto Payan: Assessing decision-making capacity in acquired brain injury: A comparative analysis of clinical tools

DB28 - Ellen Hall: evaluating the Community Projects tool to motivate clients with ongoing communication needs

DB29 - Isabelle Ellis: Digitising the OAS-MNR: Utilising digital health technology to assess and understand challenging behaviours in neurorehabilitation.

DB30 - Lesley Murphy: Love Anchor All: Observations and themes in the care and management of global amnesics

DB31 - Marcos Maldonado: Assessment of visual tracking, attention, balance and gait in people with neurodegenerative conditions under virtual reality training

DB32 - Sarah Adam: A brief CBT-based sleep intervention for individuals under investigation for dissociative seizures: a single-case experimental design.

DB33 - Cheryl Soo: Evaluation of an online delivered Acceptance and Commitment Therapy program for managing anxiety in adolescents with acquired brain injury: eHealth and treatment acceptability

DB34 - Tayla Fox: Guiding the use of the Hospital Anxiety and Depression Scale (HADS) in traumatic brain injury: Associations with clinical outcomes and development of evidence-based severity cut-offs

DB35 - Jai Carmichael: Co-developing a transdiagnostic measure of mental health tailored to acquired brain injury: A survey of expert clinicians and researchers

DB36 - Steph Reeve: Reaping Rewards: A systematic review of contingency management for individuals with traumatic brain injury that use substances
